

GIGHUB: CAMPUS GIG FINDER

Your one-stop app for finding flexible gigs
that fit your busy student schedule.

Prepared by Pauline Dejos

PROJECT DESCRIPTION

This software aims to become a platform that connects VSU students (users) with freelance gig opportunities posted by creators.

SCOPE

The scope of this project is the Visayas State University Main Campus, targeting college students and faculty members that have the need to look for gigs or post gigs

GOALS

- To provide users with an easy way to find relevant freelance gigs.
 - Allows creators to reach a wider student audience for their gigs.
 - Enable students to organize and save interesting gigs for future reference
- 

USER REQUIREMENTS

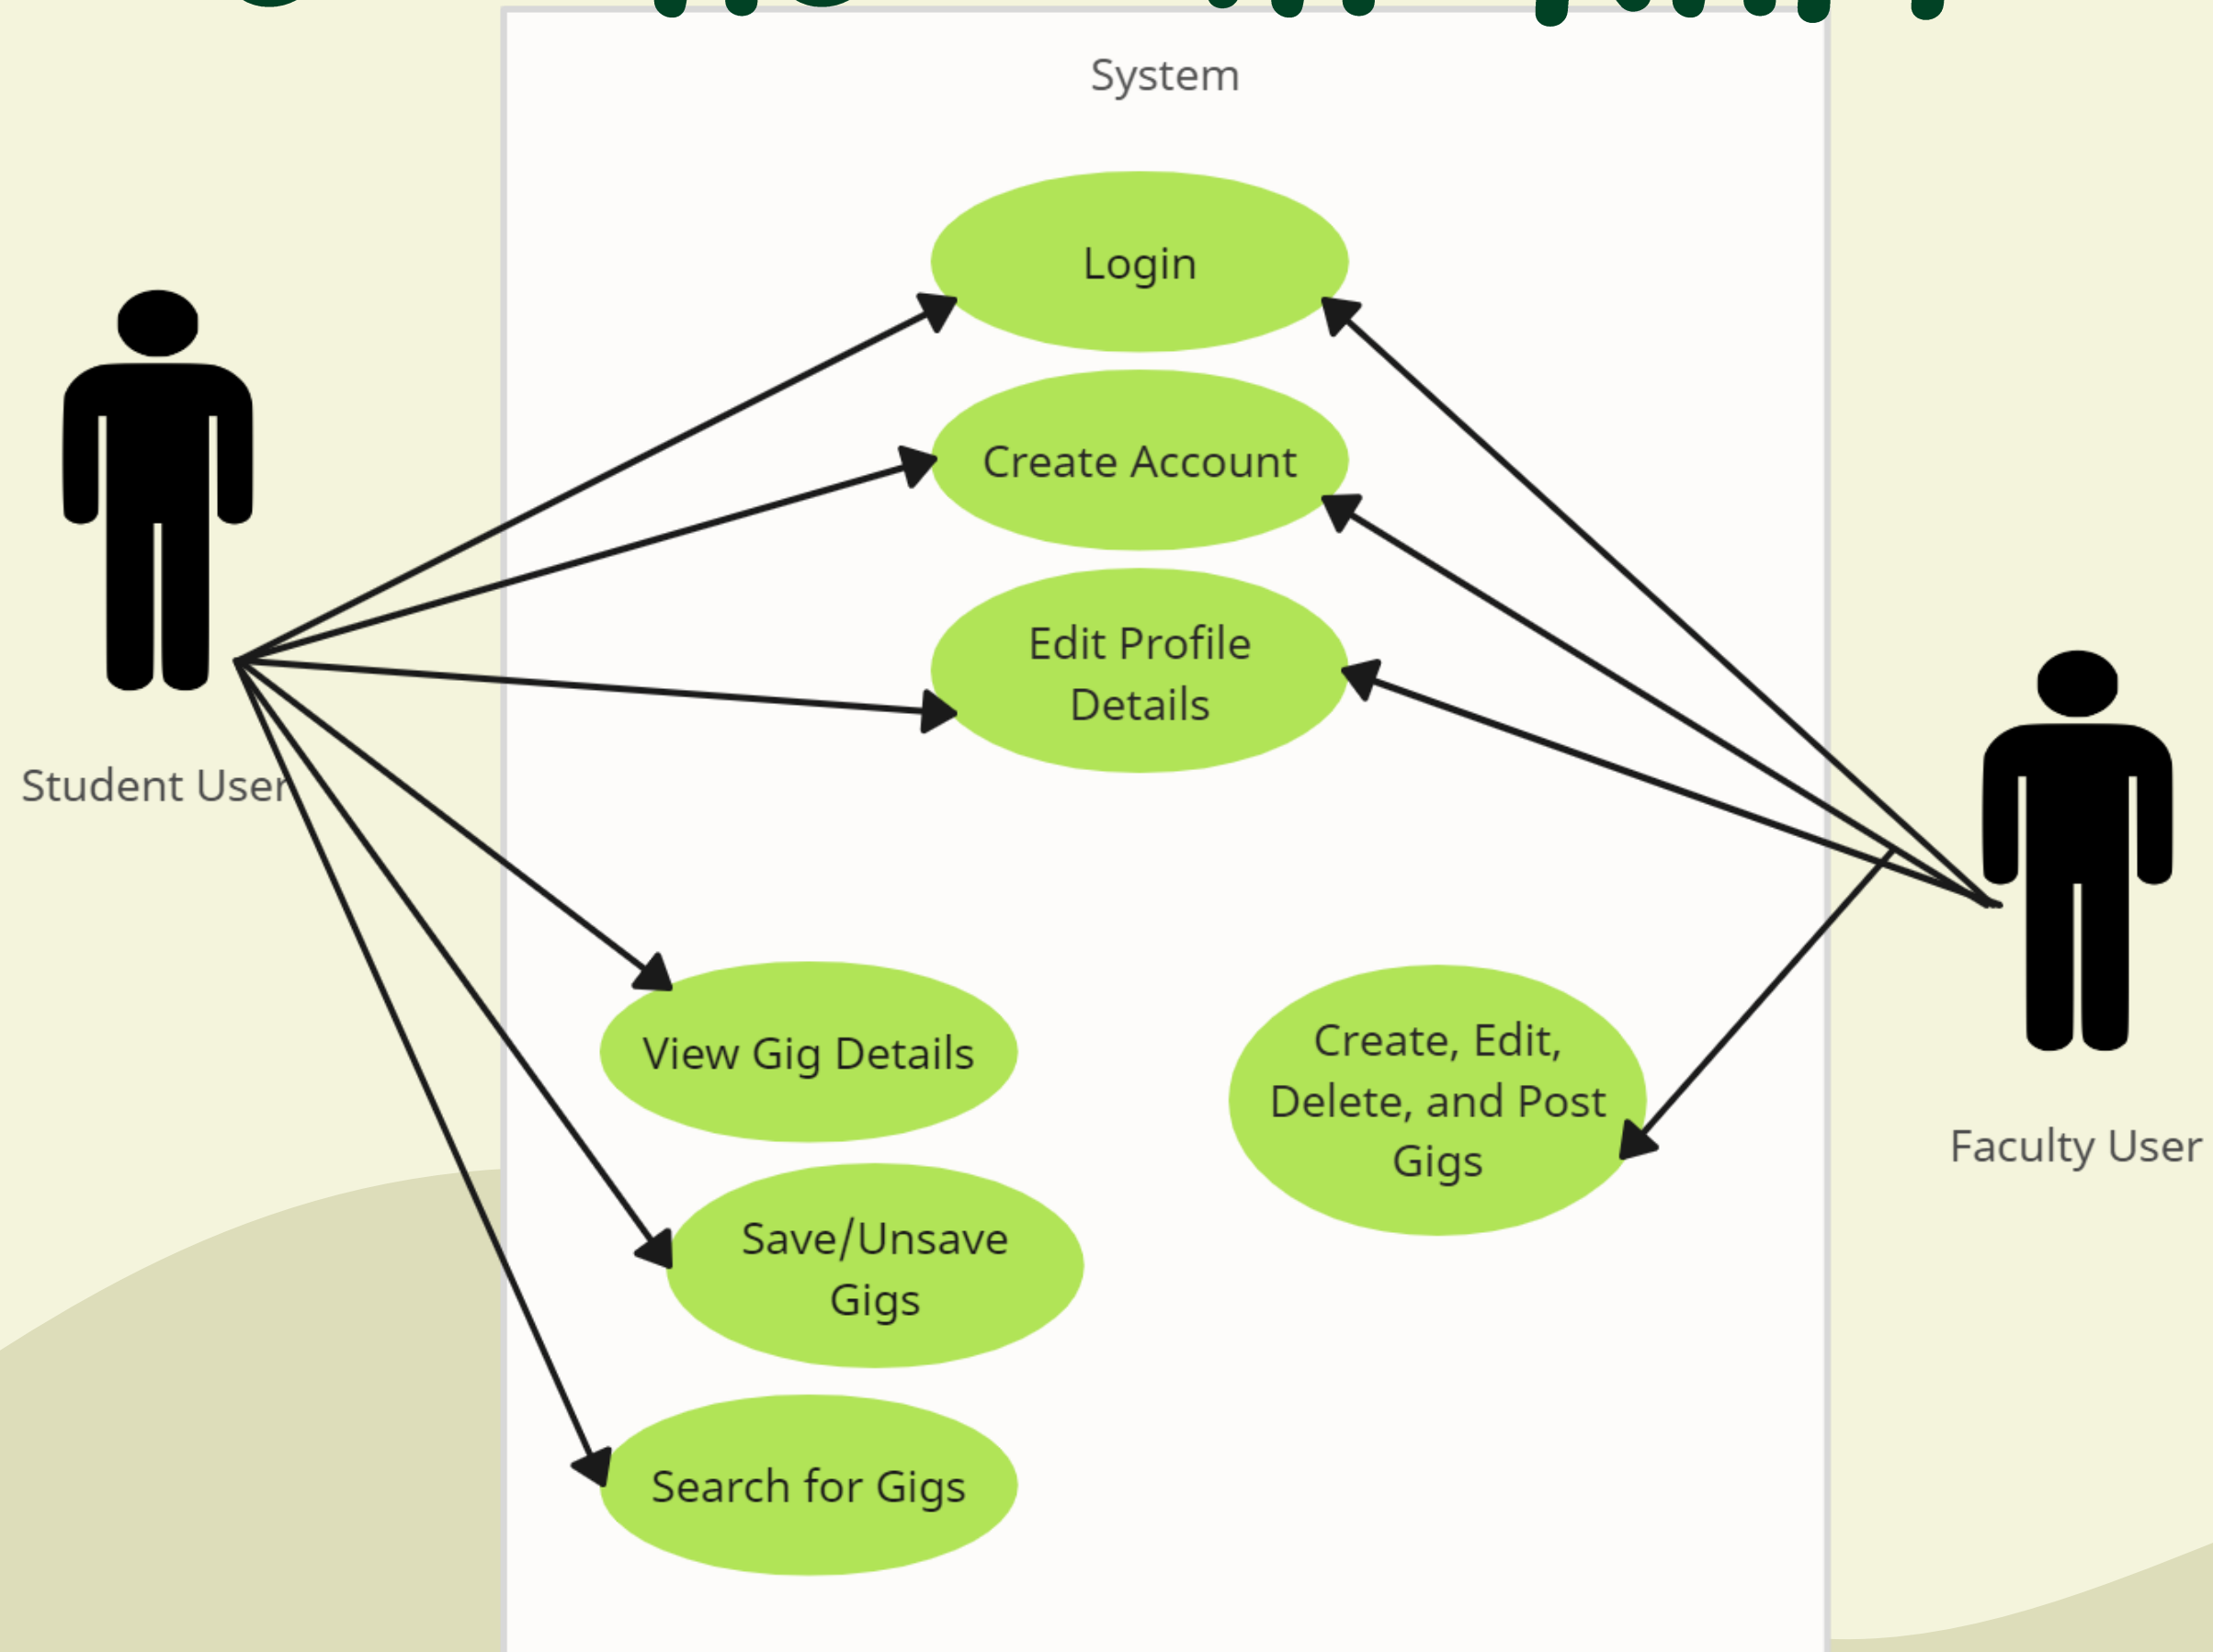

- Students can search for gigs using keywords or filters (future enhancement).
- Students can view detailed information about each gig (title, description, rate, location, skills required, etc.).
- Students can save/unsave gigs to track their interest.
- Students can manage their saved gigs (view a list and remove saved gigs).

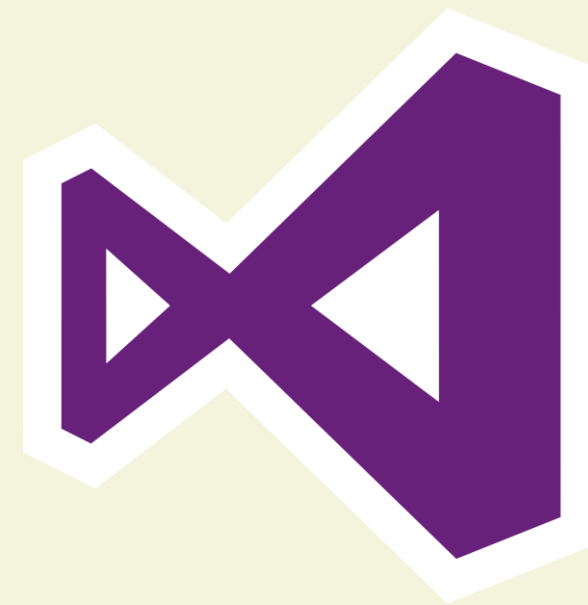

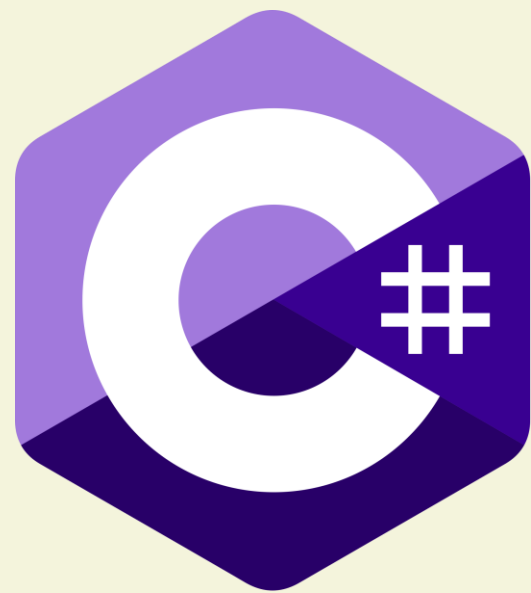

SYSTEM REQUIREMENTS

- The system should store information about gigs
- The system should store information about students
- The system should allow searching for gigs based on keywords (title, description, skills).
- The system should track saved gigs for each student (linking tables or boolean flag approach).
